- The Aged Solid Brass/Copper shades have a black look. The Bright Solid/Copper shades have a bright finish and the outside to give them a brighter finish and the cleaned (not buffed) and then left raw. The shades will preserve the look for longer. Both finishes will be dependant on the environmental conditions that the brass and bright copper shades will patina at an oil-rubbed finish.
- Our brass and copper shades are made with a natural finish. The finishes are not designed to be a uniform, so the natural finish can only be achieved through electroplating. The beauty of choosing natural materials are the imperfections and patina which continue to develop. The imperfections are not considered defects.
- The Vintage Steel shades are made from quality steel and then oil-rubbed to give it a matt finish and a natural rusting/ spotting. This preserves the raw vintage look though dependant on the environment. The shades may display minor spot rusting if it is in line with the intended style and is not considered a defect.
- The lamp holder takes three standard bayonet (E27, 60W).
- Please contact us prior to ordering. This item may incur additional postage to be paid on what is stated.
