- Optional mount kit with tubular framing is also available for all models

Category: Heat Lamps

Brand: Roband

Description

Description

Roband is delighted to play our part in the official *Australian Made* campaign.

A wide range of equipment now carries the official “**Austalian Made**” logo from **Roband** branded bench top equipment to grill stations, milkshake mixers as well as the **Austheat** range of floor standing electric fryers & griddle/griddle toaster.

All backed with industry leading *warranty, parts and service*.

The stylish and functional Roband quartz heat lamp assemblies provide a balance of heat and light to front or back of house applications. They are manufactured from an exclusive extruded anodized aluminium, with a number of different sizes and options available to suit various requirements.

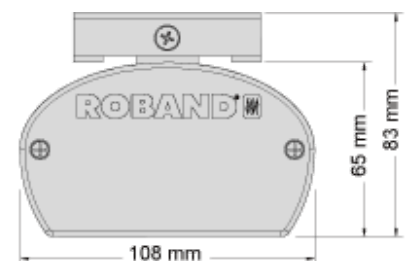

The Quartz Heat Lamp Assemblies also feature Easy Fit globes which have a protective quartz outer layer that encapsulates the inner globe allowing for easier handling, and are easily replaceable without the need for an electrician.

Standard Models

The standard heat lamps (e.g. HQ450E) come **with** a control box that houses the isolating on/off switch. They also feature a simple mounting system and come complete with a 10 Amp plug and cord.

Fabricator Models

The heat lamp assemblies are also available without the control box and on/off switch (e.g. HUQ375E) so they can be connected to a remote switch setup.

Dimensions for Standard Quartz (HQ), Fabricator Quartz (HUQ) and Fabricator Infra-Red (HUE) models. The mount bracket is removable.

The removal of the control box shortens the length of the lamp assembly accordingly. These HUQ models come with the standard mounting mechanism, or optional mount kits which are available with tubular framing.

Watch this video to see how easy it is to change the light globe
