

Grass Wall Light by Forestier

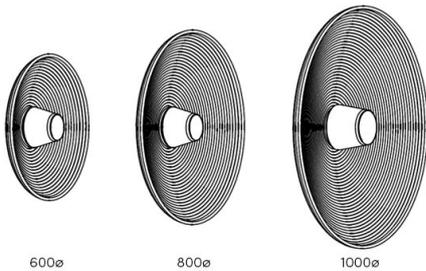

The Grass Wall Light series by Forestier is one of their latest additions, designed by Jette Scheib. In her Grass collection, Jette Scheib emphasizes that it is intended to express the peace that resides in the weaving process and the connection of basket makers with the nature that surrounds them.

Each shade is woven from multiple strands of coloured raffia which produces a beautiful textural quality in each shade. All shade sizes are capped with a timber detail that adds to the intrigue of this design.

Grass Wall Lights are perfect for small and large-scale installations ranging from a beautiful hall or lift lobby to a cluster of varying sizes in a foyer to create a bold statement!
