

Unlock the finest
Metal Plate Range
in the world!

**METALPLATE
RANGE**

clipsal.com

The Right Combination of *Good looks and Easy Installation*

Clipsal's popular B-Style metal plate range has been a mainstay of the electrical accessories market for several decades. Its solid metal construction has made it the ideal choice for commercial environments, while its stylish good looks and sleek lines make it perfect for today's modern homes and office suites.

As if it weren't already superior to anything else on the market, the B-Style range has recently undergone some design changes. The result? An even better looking product and a simplified installation. Available in two styles (BSL for stainless steel and BBSL for brass), you can now unlock the finest metal plate range in the world for yourself.

One size fits all

Metal plates have become incredibly popular in recent years, but installing some metal plates in existing homes often required messy wall re-trenching or specific brackets to fit some products to the wall. Not anymore. The introduction of the BSL25A (twin switched socket) means the most popular BSL wall plate can now be fitted to most standard wall clips, brackets and boxes without the need for any special mounting brackets.

The new BSL range is also available with a twin switched socket with extra removable switch (BSL25XA) that allows for integration of any 30 series switch mech. This is particularly handy in kitchens where 35A isolating switches are compulsory for electric cooktops.

Both the BSL and BBSL range now include five and six gang pattern switchplates and all plates measure a standard size of 130 x 85 x 1.2mm to ensure a uniform look for all installations.

New Features

Benefits

Twin switched socket (BSL25A) fits to most standard wall clips, brackets or boxes.

Easier to install than ever before.

Twin switched socket with extra removable switch (BSL25XA) allowing insertion of any 30 series switch mech.

Increases flexibility of product. Perfect for kitchens that require 35A isolating switches for electric cooktops.

Switches now available in 5 and 6 gang on standard pattern plate (as well as existing 1 and 4 gang).

Ideal for areas where multiple switches are required for increased lighting zones. No need for oversized or extra switchplates to be installed – ideal when mounting space is limited.

1.2mm thickness.

Now even thinner (previously 1.6mm). Perfect for modern homes and offices where low profile plates are desired.

Standard size of 130 x 85mm.

Ensures uniform look throughout the range.

Double powerpoint features centralised switch positioning.

Ensures a modern, streamlined appearance.

Nothing else
